

BUREAU OF STREET LIGHTING DIRECTIVE NO. 416

ELECTROLIER SETBACK

This Directive is issued to clarify the setback standard for newly installed or relocated electroliers. All proposed electroliers shall be installed with centerline 30" behind the curb face, and with luminaire arm oriented over the street perpendicular to its centerline. Exceptions to this would include meeting ADA (Americans with Disabilities Act) requirements, substructure conflicts or other field condition/design concerns. Exceptions shall be approved by the Senior Street Lighting Engineer.

A handwritten signature in black ink, appearing to read 'Ed Ebrahimian', written over a horizontal line.

Ed Ebrahimian, Director
Bureau of Street Lighting
